

WHO WE ARE

The Aurora School Trust is a UK based charitable organisation that seeks to help further basic education, specially at the secondary level in the country of Angola.

Through practical assistance, specifically by supporting the Angola School Project (ASP) we are eager to play a part in helping young Angolans shape their future.

We are a group of people coming from different backgrounds and geographic horizons but united around a common goal: **To ensure that the long suffering Angolan youngsters get the best start in life they need and deserve.** We invite you to join us in this worthwhile cause.

OUR VALUES

Dignity

We recognise that every individual needs to be valued and respected. This is what we seek to promote in our project.

Collaboration

We do not claim to know it or to be able to do it all. We strive to work with all who pursue similar goals.

Accountability

We seek to be accountable to all who support us as well as to those we want to serve.

THE SCHOOL PROJECT

The vision fostered in this project is to found a secondary school as a contribution to the effort in alleviating the pressing need for basic education in Angola.

The project

The school project will be a two-phase programme consisting of two educational stages. The first will be a preparatory phase lasting a couple of years and the second will last four years.

As a starting step for the school we plan to build six rooms: two for normal classes, one for housing the school library and also to be used for IT classes, a multi-purpose room for specialised activities e.g. laboratory, workshops, etc., and a double-room for administration and staff.

The activity rooms should be able to provide enough space for at least twenty-five students with essentials for normal academic use.

Celebrating a new dawn of hope

WHY ANGOLA

Situated in the southwestern part of Africa, Angola has just come out of three decades of an atrocious war. Every aspect of live has been seriously affected by the ongoing unrest in the country and the education sector has had its share of devastation.

The need for education is urgent because according to Unicef around 70% of the people of the country estimated to be 12 million is under 24 and more than half are children. Many of these have never been to school or have been only sporadically in school.

In a country emerging from a long and brutal war, where the majority of the population is so young the consequences of lack of proper, solid education are unimaginable.

As peace consolidates there has never been a better opportunity in Angola for sowing the seed for self-reliance and prosperity for the future.
